

SMRITI N

XR Developer | Unity Developer | Full Stack Engineer

PROFESSIONAL SUMMARY

XR Developer and Full Stack Engineer passionate about building immersive AR/VR applications and modern web experiences. Experienced in Unity, C#, Vuforia, XR Interaction Toolkit, React, Angular, Node.js, and Supabase. Developed interactive VR games, marker-based AR applications, and scalable client websites with secure payment integration. Passionate about combining creativity, problem-solving, and technology to create engaging digital experiences.

EDUCATION

Bachelor of Science - Computer Science
Minor: Innovation, Entrepreneurship & Product Development (IEPD)

EXPERIENCE

- Freelance Full Stack Developer
 - Built responsive business websites and e-commerce platforms for multiple clients
- Developed modern web applications using React, Angular, Node.js, and Supabase
- Integrated Razorpay payment gateway and authentication systems
- Worked directly with clients from requirement gathering through deployment
- Delivered production-ready applications with responsive UI and optimized performance

CERTIFICATIONS

UNITY BADGES

Badge icons placeholder

- Unity Essentials
- Unity Mobile AR Development
- Unity VR Development
- Unity Game Development

TECHNICAL SKILLS

XR PROJECTS

SEE VR - Escape Room (Unity • C# • XR Interaction Toolkit)

- Developed an immersive VR escape room experience
- Implemented object grabbing, puzzle-solving mechanics, and interactive gameplay
- Designed optimized VR interactions using Unity XR Interaction Toolkit

Laptop Information AR (Unity • Vuforia)

- Marker-based augmented reality application
- Displays laptop specifications and product information by scanning image targets
- Designed for interactive product visualization

Food Menu Information AR (Unity • Vuforia)

- Built an AR food menu system for restaurants
- Displays interactive food information using image recognition
- Focused on improving customer engagement through augmented reality

Developer Portfolio (Next.js • React • Tailwind CSS • Framer Motion)

- Designed and developed a responsive personal portfolio
- Showcases XR projects, web applications, and technical skills
- Optimized for performance and deployed on Vercel

XR Development: Unity, C#, Vuforia Engine, XR Interaction Toolkit, AR Development, VR Development

Frontend: React, Next.js, Angular, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript

Backend: Node.js, Express.js, Supabase, REST APIs, Razorpay Integration

Tools: Git, GitHub, VS Code, Cursor, Blender, Figma
